I would like to ammend my first comments concerning retention of the Morse Code as a requirement for HF access in the Amateur Radio Service. I support eliminating the morse requirement for the General Class. However, I would support retaining the requirement for Amateur Extra class. This would provide at least some trained operators who could use Morse Code in an emergency situation if required. I would also support a higher speed requirement than 5 WPM like the old 20 WPM.

Thanks for the opportunity to comment.
